WA BIODIVERSITY OFFSETS FORUM

One Day Forum

25 November 2025 | University Club of WA, Crawley

NOW OPEN FOR REGISTRATION!

Western Australia's biodiversity offsetting framework presents opportunities for improvement to enhance conservation outcomes. Operating under Parts IV and V of the Environmental Protection Act, the current system would benefit from greater coordination between regulatory pathways and more systematic tracking of offset effectiveness. As a global biodiversity hotspot facing pressures including historical vegetation clearing in the Wheatbelt, Western Australia is well-positioned to lead innovative offsetting approaches.

This one day forum harnesses WA's community of practitioners to explore a critical question: 'How do we make offsetting more effective in delivering improved biodiversity outcomes?'. The forum will workshop practical solutions and develop collaborative proposals for the WA Government to enhance offsetting as a conservation tool.

EIANZ member	\$250 AUD
EIANZ student member	\$100 AUD
Non-members	\$350 AUD
